

## Corporate Overview

Westell Technologies, Inc. with headquarters in Aurora, Illinois was founded in 1980 and became public in 1995 (NASDAQ: WSTL).

**OSPLANT SYSTEMS™**, a Westell Business Unit is a leading provider of Next Generation Outdoor Cabinets, Enclosures, Power Distribution, Edge Connectors (Fiber, Ethernet Coax), Remote Monitoring, as well as ancillary network protection, cables and connector solutions.

The Power Distribution and Remote Monitoring solutions are provided through Westell's Noran Tel subsidiary and marketed and sold through the OSPLANT SYSTEMS Business Unit.

Westell's Customized Systems Integration Services offer customers with a one-stop-shop for complete turnkey solutions.

Our solutions are ideal for Wireless Backhaul and service delivery to Enterprise Markets and other communication services as offered by Telephone Companies (Wireline Carriers), Wireless Carriers, Cable Carriers, or MSO's and Utility Markets worldwide.

Westell is both ISO9001 and TL9000 qualified and registered. Superior quality is crucial to Westell's legacy. Our Quality Mission... "to achieve Total Customer Satisfaction", is the foundation of all functions within Westell.

In addition to providing and maintaining High Quality, Westell OSPLANT SYSTEMS operating motto is:

**We Listen**  
**We Understand...**  
**And We Deliver!**

As a result we aim to please and look forward to serving your needs now and into the future.

Sincerely,

Westell **OSPLANT SYSTEMS™** Team

**Cabinets & Enclosures**

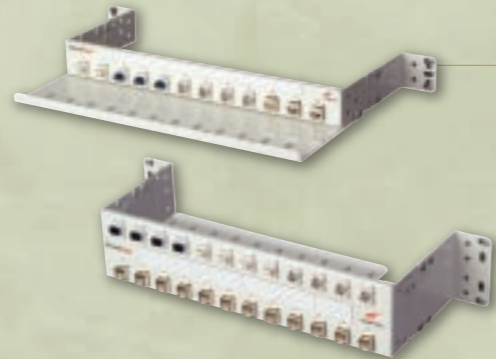

A market leader in Next Generation outdoor enclosures, offering innovative robust designs and solutions for today's telecommunications systems.

Our superior reputation for quality, exhibited by easy to install and maintenance-free designs that are compliant with strict industry standards.

**Wall Mount Racks**

A practical, space-saving solution for rack mounted equipment. Westell's SwingRack is a hinged rack design that swings the rack equipment, from a horizontal position into an upright, vertical position to safely store equipment out of the way. The SwingRack can easily be lowered to the horizontal for equipment installation and maintenance.

**Ethernet, Fiber & Coax Panels**

Westell has Rack/Wall mount Ethernet hand-off solutions that offers flexibility to handle copper, coax, and fiber connectivity. Our connectivity panels are a simple, sturdy, and flexible platforms used to terminate high speed Ethernet services in any combination.

**Power Distribution Panels**

With network reliability one of our top priorities, we provide an extensive line of Secondary Power Distribution products ranging from fuse and breaker panels to alarm panels. Offering all of the standard fuse and breaker options used in today's dynamic networks.

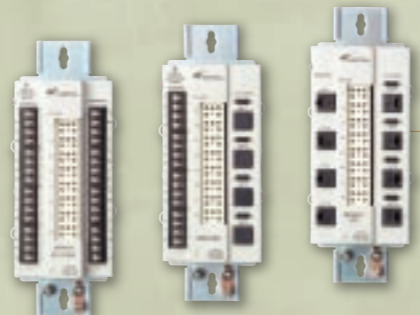

**Remote Monitoring**

The SiteVu™ family of products provides complete visibility to remote site environmental and equipment status from the user's desktop, giving the user real-time Performance Monitoring solutions.

**Battery Monitoring**

BattVu is designed to reside in small Remote Terminal (RT) or cabinet locations where there are power plants equipped with batteries. BattVu will log information about any commercial power disruption and automatically perform a Battery Rundown Test and record the results which can be retrieved by the USB craft port or via the USB Plug-n-Go port.

**Lightning Protection**

Westell prides itself as a value leader, providing solutions to protect our customer's critical telecommunication infrastructures. Our protection kits are designed to provide lightning protection for today's highly sophisticated and expensive telecommunication electronics..

**Cables & Ancillary**

To round out our Outside Plant products, Westell provides a myriad of ancillary products including 25 and 32-pair connectorized cables (male and female) from 5 feet to 200 feet, assorted connector, as well as power supplies to simplify your installation needs.

**Customized Systems Integration Services**

Westell offers a one-stop-shop for complete turnkey solutions reducing time-to-market and expense through third party contractors and/or eliminating the need to design, assemble and test on the job site. With our experienced Customized Systems Integration (CSI) Team, Westell can provide you with Systems Integration Design Services including; Assembly and Test prior to shipment.
